TO WHOM IT MAY CONCERN:

We are a property owners association located in the Southeast. In April 2014, our by-laws were amended to allow for electronic voting to include Board of Director (BOD) elections. In late July, we began our search for a provider to manage our electronic voting for our November 2014 BOD election. We were apprehensive about changing from the paper ballot method to the electronic method because of our limited knowledge in the whole electronic voting process. We contacted two reputable companies, but after our first contact with VoteHOANow executive Scott McKeel, we knew VoteHOANow was the provider we wanted to partner with—not only because of their “user friendly” system and affordable pricing, but because Scott genuinely seemed to care about our needs.

VoteHOANow’s team of professionals made the whole process effortless. They are very customer service oriented with a willingness to assist in any way.

Our 2014 BOD election was a success. We met both, the election and the meeting quorums. We also received many favorable comments from our membership about the total experience of the electronic voting. We would highly recommend VoteHOANow to any company that is looking for a provider that has a great product and a team of professionals that truly care about their customers.

Sincerely,

Betty Carol Jones
Director of Administration/Human Resource
